## CERTIFICATE of ANALYSIS 1

Product Code: [33813-2080](#)

Product Description: Relative Humidity Detection Test Strips

These test strips are treated with CoCl and other ingredients.

The Humidity test strip contains 4 test pads with a blue indicator, which is discolored to a pinkish color according to relative moisture in the air. The process is reversible - the pads revert back to their original blue color if allowed to dry.

The test strip responds to the relative atmospheric humidity in the range of 20% – 80%, in the steps of 20 – 40 – 60 – 80%.

Each batch of test paper is tested before release for sale.
